

Project Bona Fide presents its 12th annual

# Permaculture Design Course

Feb. 1-14, 2017

Finca Bona Fide  
Isla de Ometepe, Nicaragua

with Mitch Haddad, Christopher Shanks, and Scott Gallant

We teach a standard 72-hour PDC curriculum with a special emphasis on forest gardening in the tropics, including agro-forestry, wildlife corridors, agro-silvo-pastoral systems, and agro-ecology.

Join us to learn about:

- *Principles and Ethics of Permaculture Design*
- *Site analysis and design, from the tropics to temperate regions*
- *Landscape planning and microclimate design*
- *Design for climate change*
- *Regenerative Land Management*
- *Water catchment, storage, filtration, and distribution*
- *Biologically based treatment of greywater*
- *Natural building techniques*
- *Organic horticulture*
- *Medicinal plant propagation and usage*
- *Soil rehabilitation and fertility strategies*
- *Myco-forestry and myco-filtration*
- *Renewable energies and biofuels*
- *Urban and suburban permaculture strategies*
- *Networking within the permaculture community and beyond*

Tuition includes 3 daily meals, lodging, and all course materials:

**\$1350 visitors, \$1050 expats, \$750 Central Americans**
