

PROJECT BONA FIDE PRESENTS ITS 13TH ANNUAL PERMACULTURE DESIGN COURSE

FEBRUARY 2-15, 2018

**FINCA BONA FIDE
ISLA DE OMETEPE, NICARAGUA**

WITH SCOTT GALLANT, MITCH HADDAD, AND CHRISTOPHER SHANKS

HELD ON ISLA DE OMETEPE, AN ISLAND OF TWIN VOLCANOES ON LAKE NICARAGUA

We teach a standard 72-hour PDC curriculum with a special emphasis on forest gardening in the tropics, including agro-forestry, wildlife corridors, agro-silvo-pastoral systems, and agro-ecology.

Join us on our 26-acre permaculture site to learn about:

- Principles and ethics of permaculture design
- Site analysis and design, from the tropics to temperate regions
- Landscape master planning and microclimate design
- Design for climate change
- Regenerative land management & stewardship
- Water catchment, storage, filtration, and distribution
- Biologically based treatment of greywater and blackwater
- Natural building techniques
- Organic horticulture
- Medicinal plant propagation, usage, and preparation
- Biointensive gardening and seed saving
- Soil rehabilitation and fertility strategies
- Myco-forestry and myco-filtration
- Renewable energies and biofuels
- Urban and suburban permaculture strategies
- Networking in the permaculture community and beyond

\$1350 VISITORS • \$1050 EXPATS • \$750 CENTRAL AMERICANS

Tuition includes three meals per day, lodging, and all course materials.
